ABSTRACT

The bibliography lists several hundred print and audiovisual references relating to disabilities. Many are written about, or have implications for, Manitoba. Citations are included for four broad areas (sample subtopics in parentheses): general works; types of disabilities (fiction and nonfiction works regarding emotional disorders, hearing impairments, learning disabilities, mental retardation, physical disabilities, and visual impairments); architectural and environmental considerations (recreation, sport, physical education, and transportation); and mainstreaming (general education and employment). Listings are also provided of periodicals; other bibliographies (on children's literature, education, films, and sport and recreation); and agencies, associations, and government departments. In addition to a brief annotation, citations usually include information on author, title, publisher, date, and length (for film). (CL)

INTRODUCTION

This annotated bibliography has been compiled as a selective guide to assist librarians, teachers, and other interested individuals or groups in acquiring print and audio-visual materials relating to disabilities. The particular emphasis of this bibliography is on those works pertinent to Manitoba. Some of the materials included have been published or produced in the Province, while others contain information on Manitoba within larger works. A number of titles, while not bearing specific relation to Manitoba, have been included due to their relevance to the field at large. Moreover, many of these titles are recently published and therefore very current in the information they contain.

This guide attempts to cover a broad spectrum of issues on disabilities, and is organized under these main headings: General Works; Types of Disabilities; The Environment; Mainstreaming; Periodicals; Other Bibliographies; and, a listing of Agencies, Associations, and Government Departments in Manitoba.

These headings are further subdivided in the following manner: under General Works (titles too general to fit under a specific subject heading) are the subheadings, Print Publications—books, articles, pamphlets, as well as government publications; and, Audio-Visual Materials—films, filmstrips, A/V kits, cassettes, or other non-print material.

Under the heading, Types of Disabilities, are listed specific types, namely: Emotional Disorders; Hearing Impairments; Learning Disabilities; Mental Retardation; Physical Disabilities; and, Visual Impairments. Titles are then listed under the appropriate type of material, that is, Non-fiction (the latter includes novels, plays or other fictional works which portray positive images of the disabled and which are Canadian titles or those notable for their literary merit and sensitive treatment of the subject matter), or Audio-visual materials.

The next category is entitled: The Environment: Making it Barrier-Free. Here, titles are categorized under, Architectural Accessibility; Recreation, Sport and Physical Education; or Transportation, and according to whether they are Print Materials or Audio-visual Materials. Since all titles in this section are non-fiction, there was no need to distinguish between that and fiction.

Following is the section called: Mainstreaming: The Integration of the Disabled into Society. Once again, works are listed under the headings, Print Materials and Audio-visual Materials. Under Print Materials are the subheadings, General and, Education and Employment (these are combined as many works deal with both areas).

Also included in this bibliography is an alphabetical listing of periodicals or journals devoted to different types of disabilities. Some are professional journals, others for the lay reader, and some are suitable for both. Descriptions and addresses are given for each title.

As a further guide to literature in this field, there is also a section on Other Bibliographies, subdivided according to the headings: General; Children's Literature; Education; Films; and, Sport and Recreation. These bibliographies would provide more detailed information on all types of disabilities.

This selective bibliography is followed by an alphabetical listing of Manitoba Agencies, Associations, and Government Departments that deal with the disabled in a variety of capacities.

With respect to the annotations themselves, each is arranged alphabetically by author or title under its appropriate subject heading. Each annotation contains the following information: author, title, place of publication, publisher, date of publication, price (if known) and, a brief description or evaluation of the contents of the work.

No union list has been attempted. While locations from the Department of Education Library and Winnipeg Centennial Library have been given in the main, it should be pointed out that these locations are by no means the only ones where that or any of the material listed may be obtained. Please consult with the libraries listed regarding the lending policies.

Finally, it is hoped that this bibliography will serve as more than an acquisition tool. 1981 as International Year of the Disabled Persons has come and gone, but the problems and issues it has brought to the fore, remain for us to resolve. Hopefully, such efforts as this bibliography will help promote an awareness of those issues and create an understanding of the work that needs to be done.

ACKNOWLEDGEMENTS

In recognition of 1981 as International Year of Disabled Persons, the Manitoba Library Association sponsored a project to compile a bibliography on the disabled in Manitoba. This project was made possible through grants from the Manitoba Organizing Committee for International Year of Disabled Persons (I.Y.D.P.), and the Manitoba League of the Physically Handicapped, through the Secretary of State.

It has been both a challenge and a pleasure to compile this bibliography, and I would like to thank John Tooth, Chief Librarian of the Department of Education Library and supervisor of this project, for his advice and assistance. Special thanks are also extended to the rest of the staff at the Department of Education Library who were always friendly and helpful during the brief period of time I worked in their midst.

Many other individuals from various government departments, libraries and private agencies also offered help and materials, and the names of contact persons are noted in the "Agencies, Associations, and Government Departments" section of this guide. Of special note, the publishing houses of McClelland and Stewart, and Doubleday generously donated a number of books for inclusion in this bibliography, and these are now housed in the Department of Education Library.

FURTHER ACKNOWLEDGEMENTS

This project had a number of ancillary assistants, including: Father Drake, St. Paul's College, who handled the financial aspect of the project as Manitoba Library Association Treasurer; Mary Mundle, Head, Circulation and Reference Section, and, Kathy Grabowecky, Periodicals Technician in the Department of Education Library, who did some further verification of information in the bibliography; Dianne Hewitt, a library school student employed during the summer in the Library, who resolved a number of outstanding problems; and finally, to Donna Street, who typed a high-quality manuscript. Much credit goes to Norlayne Scott for her work on this close-to-impossible task.

Thanks, too, goes to Public Library Services, Department of Cultural Affairs and Historical Resources, which shared in the costs of the printing. Finally, our gratitude is extended to Special Materials Services, Department of Education, for putting this book on cassette and providing copies to selected libraries.
